EXPERIENCE AND ACHIEVEMENTS

• Experience-38 years in Fire and life safety systems

- He is a qualified Electrical and Electronic Engineer with extensive experience in the design and development of a wide range of sensors, control instruments, speaker drivers, and monitoring systems. His contributions to fire safety communication systems are particularly noteworthy, as he has introduced several pioneering technologies that are either unprecedented globally or in India.
- As one of the directors at Naveen, he oversees a comprehensive in-house development and manufacturing facility, ensuring that innovative solutions are not only conceived but also realized in practical applications. His commitment to staying abreast of the latest technological advancements, codes, and standards is integral to his role.
- His expertise encompasses designing, consulting, and tailoring products for various war control room fire safety infrastructures, including their manufacturing and installation processes. With a profound understanding of fire safety systems, he also provides third-party fire safety audit services, ensuring compliance with the latest regulations and enhancing safety protocols. His knowledge and capabilities reflect a deep commitment to advancing fire safety technology, and he continues to evolve with the dynamic landscape of the industry.

Key Expertise

- Engineering of fire safety system instruments and comprehensive fire safety system design, auditing, and consulting.
- Manufacturing of fire alarm instruments, including detectors, talkback speakers, control instruments, and panels.

Fire Safety Infrastructure Engineering Includes

- Fire Command and Control Center
- Automatic Fire Detection System
- MOEFA (Public Address + Talkback + Fire)
- Mobile phone Application for fire safety
